

NAME

Amin Mohajeri, M.Sc.

BIOGRAPHY

Amin is a doctoral student of exercise physiology with a passion for space medicine and life sciences. His research addresses the mechanotransduction mechanisms by which skeletal muscle cells sense and proportionally respond to mechanical loading alterations. Amin also seeks therapeutic approaches to attenuate the outer space microgravity- and radiation-induced cardiovascular and musculoskeletal tissue fibrosis, dysfunction, and loss of performance. In his spare time, he enjoys the outdoors.

EDUCATION

M.Sc. The University of Michigan – Ann Arbor, MI.
